PROVEN HISTORY

MyMosa entered retail in 2011.

The brand built distribution across major retail and hospitality accounts before canned wine cocktails became a crowded category.

Historical placements included Whole Foods, Total Wine, Safeway, BevMo, MGM, and other accounts across four states.

The 2027 plan treats that history as evidence, not current contracted distribution.

The relaunch starts with one market and one measurable operating plan.

Houston, Texas

January 2027 commercial launch

The distributor pays MyMosa. The Base Case begins with 25 active accounts, adds 10 accounts per month during 2027, and assumes one 24-can case per account per week.

The model uses a 5% reserve for distributor deductions and a 2% monthly account-loss rate.

The 2027 Base Case uses conservative commercial assumptions.

25

Opening accounts

10

New accounts each month

1 case

Per active account weekly

4 weeks

Selling weeks each month

Retention

2% monthly loss with 10% reactivation of lost accounts

Pricing

\$3.00 per can, no introductory period

The initial run creates 29,752 saleable cans.

30,360

Total cans

608

Sampling reserve

4 pallets

2 Orange / 1 Pineapple / 1 Peach

December 2026 production supports the January launch.

Net revenue reaches \$1.20 million in 2029.

\$278K

2027 net revenue

\$1.20M

2029 net revenue

Revenue reflects inventory-supported shipments and the 5% deduction reserve.

The model holds gross margin near 48% across the forecast.

2027

\$134,876

Gross profit

\$278,438

Net revenue

48.4%

Provisional gross margin

2028

\$334,530

Gross profit

\$690,582

Net revenue

48.4%

Provisional gross margin

2029

\$583,424

Gross profit

\$1,204,371

Net revenue

48.4%

Provisional gross margin

PRELIMINARY EBITDA • \$ THOUSANDS

EBITDA turns positive in 2028.

(7.6%)

2027 EBITDA margin

30.5%

2029 EBITDA margin

Results remain preliminary until complete COGS and accounting classifications are supported.

The account base expands to 432 by year-end 2029.

95,708

2027 cans shipped

413,965

2029 cans shipped

Production timing controls whether demand converts to revenue.

Replenishment follows demand, not optimism.

2

batches

10

batches

9

batches

Each modeled batch contains 30,360 cans.

Final order dates depend on confirmed lead times, deposits, and supplier terms.

USE OF FUNDS

The raise funds operations and preserves a working-capital reserve.

2027 operating plan	\$156,000	62.4%
Initial known and provisional production	\$22,497	9.0%
Onboarding and contingency	\$4,875	2.0%
Preliminary unallocated remainder	\$66,629	26.6%

The preliminary remainder excludes unresolved costs and final payment timing. It is not available for distribution.

INVESTMENT TERMS

The proposed structure balances investor return and founder control.

Capital	Equity	Annual return	First payment
\$250,000	20%	7.5%	Month 13

Buyback	After 24 months, the founder may repurchase 10 percentage points based on an independent valuation. No automatic buyback liability is modeled.
---------	--

Definitive documents, accounting classification, and ownership mechanics remain pending.

Four diligence items must close before external release.

- | | | |
|----|------------|---|
| 01 | Production | Refresh the three-SKU quote and validate the formula, ingredients, packaging, freight, and yield. |
| 02 | Cash | Confirm opening balances, deposits, collection timing, supplier terms, and inventory payments. |
| 03 | Accounting | Complete statement classification for financing, compensation, returns, and obligations. |
| 04 | Legal | Confirm entity, worker status, trademarks, image rights, and definitive investor terms. |

External release remains on hold until these items receive source support and professional review.
